Issue - 14 March , 2012

“Get wisdom, get understanding: forget it not; neither decline from the words of my mouth. Forsake her not, and she shall preserve thee: love her, and she shall keep thee. Wisdom is the principal thing; therefore get wisdom: and with all thy getting get understanding.” Proverbs 4:5-7

Dear Friends,

“God grant me the serenity to accept the things I cannot change, the courage to change the things I can, and the wisdom to know the difference”. Reinhold Niebuhr

There is always another rung of the Ladder to be climbed. Life is movement; it is change; it is growth. No soul can remain in the same state all the time. Nature cannot remain static; it is ever changing, expanding, growing from one stage to the next. We as mentors watch the changes taking place in the lives of our staff and students every time. No one can resist change but we can guide ourselves and others to have positive change in our out look, way of thinking and molding our character and attitude based on the set norms of the society and institution where we live and work.

He who will not apply new remedies must expect new evils; for time is the greatest innovator states Francis Bacon. Often change is not comfortable because it demands courage to face the impact of the change. It may demand our time, energy and resource. It is always advised by our elders and even by us to our staff and students to accept a little discomfort so that new insights can evolve in and through. Transforming us into new being filled with light, love and inspiration is utmost necessity in our day today living.

Everyone thinks of changing the world, but no one thinks of changing himself states Leo Tolstoy. As a seed corn produces grain, we are propelled to prudence results and show new avenues and climb up new heights as we grow in maturity and wisdom. Those who fall prey to ego, self boasting and intellectual pride will never be able to experience a healthy change in life even if they reach the ladder of name, fame and positions. Simplicity, living in the present, giving a legitimate space to all to bloom and helping others to live a peaceful life will help us to have a very smooth ride towards a vibrant journey of change and accomplishment.

Kahlil Gibran states that if you cannot work with love but only with distaste, it is better that you should leave your work. Yes let us not put pressure on people by our influence and intellect. We are accountable to upkeep the values of the institutions. If we create distaste in the lives of others and try our best to win the race pushing others down what contentment we get? It is merely boasting oneself and boosting the ego which will bring only momentary pleasure.

He who rejects change is the architect of decay. Hence let us change ourselves from selfish motives!

Change is only constant; Let us change our negative thinking and be positive even in the midst of failures and misunderstanding!!

Change is such hard work; may we work hard to change self pity, insecure feelings, prejudice, guilt and anger!!!

Getting Help from Your Inner Voice

We can't exactly define what the inner voice is but certainly it is present in everyone of us, helping us sense good and bad, differentiate right from wrong and make decisions. This voice is a compound of your personality and past experiences, being specific for every person. You will never hear your inner voice speaking loud to you, but its messages are reflected in your behavior and attitude. If you wish, you may call your inner voice your soul. Harnessing its power should be something you must be aware of, to be able to use it whenever you need it.

Life is all about three relationships:

1. Intra-relationship -your relationship with yourself.
 2. Interrelationship - your relations with others.
- Spiritual relationship -Your relationship with God.

How to maintain a good relationship:-

Know clearly about each other

Bond. This means spending quality time together. Do things together, have a milkshake or coffee together regularly, have heart-to-hearts, and go places together.

G.K. Chesterton: Education is simply the soul of a society as it passes from one generation to another

- Whenever you have doubt in your mind you can consult him/her.
- Feel frank to share every problem. You need to have trust.
- Take advices & help at the time of need.
- Never leave him/her alone at the time of your happiness.
- Try to listen what he/she wants to tell you.
- After that you can place your views.
- Don't be possessive. That isn't good relationship but domination.
- Allow yourself and your best person to be good person with others also.

Tips to maintain good relationship:-

Honesty, Support, Understanding, Trust, Punctuality, Respect, Freedom, Faithfulness and Fun.

Inter- communication

Inter communication is the face to face speech to one another, that is to share idea between two party. Communication facilitated dialogue, exchange of ideas as well as expression of human emotions between people. Thus, it helps to build and maintain relationships.

Accept and respect yourself. Communicate better. Motivate yourself and others. Develop better relationship. Become better role model for your subordinates. Make your life healthier, happier and lose weight in the process.

“Life is a short visit, enjoy the stay. You are more than you think you are”

Our Attitude towards Life

Not all the things that happen around you are pleasant and under your control. If you are not well prepared, bad things will affect your mental and can defeat you. No matter how bad the situation gets, try always to be the one who decides how to react to it and how much it can affect you.

It is essential to always pay attention on the positive aspects of any occurrence. In other words, try identifying the good parts in everything. Even though it might sound foolish at the beginning, seeking the good aspects in the worst situation of all will help you improve your way of seeing the world and, in no time, you'll find yourself thinking in an incredibly constructive and positive manner.

Dysfunctional behavior in the work place ...

Low Levels

- Brief irritation, which may divert attention away from work.
- Poor communication and reduced trust.
- Reduced honesty and directness, Defensive and blameful behavior.
- Reduced propensity for risk-taking, Poor decision-making.
- Increased conflict with fellow workers.
- Decreased team effectiveness.
- Inappropriate outbursts at the workplace.
- Venting of job frustrations at home.

Dysfunctional behavior ...

Severe Dysfunctional Behavior

Destructive behavior, Overt blocking of company tasks or procedures.

Active promotion of a negative attitude in others, Murder, Suicide.

Lead and inspire people. Do not try to manage and manipulate people. Inventories can be managed, but people must be led.

I believe..... That our background and circumstances may have influenced who we are, but we are responsible for whom we become.

“Work as if you were to live hundred years, pray as if you were to die tomorrow”. Benjamin Franklin
